

TIPS TO PACK/UNPACK EFFICIENTLY

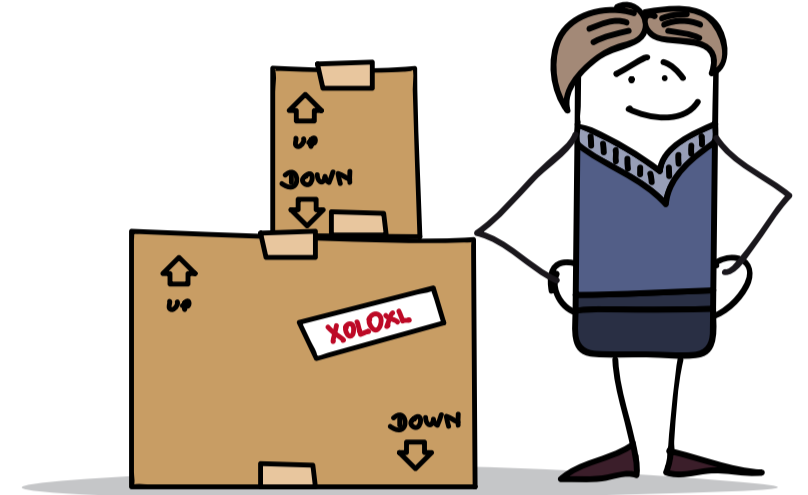

Pack one room at a time, starting with non-essential items such as:

- artwork/decor
- clothing/shoes/accessories
- books/DVDs/video games
- extra linens
- non-essential kitchen supplies
- office supplies

Label & organize your boxes

You will find yourself being more organized while packing and unpacking when you label your boxes by room. Don't forget to place "FRAGILE" stickers or labels on boxes with breakables and make sure your movers are handling them with care.

Store your packed boxes in each room until loading time

When moving day comes, you can easily organize the moving truck by room. This way, you can unload each box and place it neatly in the room it belongs in your new home. Heavier boxes place to one side of the room, while the lighter boxes to the other.

Load the largest, heaviest furniture and appliances in the moving truck first

Wrap anything that is not boxed, wrap or place in plastic bags to avoid damaging during the move. Remove drawers of dressers, and place all mirrors and pictures between the mattress.

Fill the rest of the truck space with boxes (floor to ceiling)

Heavier boxes must go on the bottom, and lighter boxes should be placed on top. Make sure you explain to your movers which side of the room has the heavier boxes for proper loading.
